

## URGENTLY REQUIRED

PT Bukit Jaya Abadi was established in 1975 and it has been recognized as a prominent EPC company in Indonesia, specializing in Engineering, Procurement, and Construction works (EPC) for Steel industry. The services offered by the Company range from consulting, design engineering process, development, planning, to turnkey construction with the highest quality standard. The Company has 40 years of experience in constructing public facilities and utilities across provinces in Indonesia, from transmission lines, telecommunication towers, power energy infrastructure, airports, bridges, stadiums, commercial high-rise building, to industrial processing plants and warehouses.

The Company continuously improves its quality and services through attaining quality human resources and integrated professional management. The Company has also invested in developing Information Technology strategies and applications to increase productivity, eliminate non-value-added activities, and to improve services and customer satisfaction.

1. Site Manager & Project Manager  
Male, maximum 40 years old
